GROUP BENEFITS

Attention: Business Owners

You have worked hard to build your business into the success it is today, and we know it is important for you to exceed your current level of success. Specialty Wealth & Financial can help by arranging a comprehensive group benefits plan for your employees—even if there are as few as three of them.*

By investing in group benefits for your employees:

- You can better attract and retain good people, which helps reduce costs associated with high turnover
- You and your plan members have access to insurance at a reduced cost, compared to most individual insurance plans
- Your premium may be tax-deductible as a business expense
- You can help improve morale and increase productivity by helping provide financial security and support for your employees

Do you already have a group benefits plan in place?

We would be pleased to perform a market survey to ensure you are getting the best value possible.

* Please note that (in special circumstances) we have access to a company that provides benefits for business with only one employee.
